Key Findings:

- Sales Dominance: Xiaomi leads in sales with 3.4M units, followed by Samsung with 3.2M units.
- Popular Processor: Qualcomm processors are the most common, being used in 168 mobile phones.
- RAM Distribution: Samsung phones have the highest average RAM (5.74 GB), while Apple has the lowest (3.50 GB).
- Screen Size Preferences: Consumers are split between large screens (5.02K) and very large screens (4.43K).
- Color Choices: Black is the most popular base color, followed by blue and white.
- Brand Unit Sales: Realme has sold the highest number of units (4K), followed by Xiaomi (4K) and Samsung (1K).

Overall, the dashboard suggests a strong preference for Xiaomi and Samsung phones, particularly those with Qualcomm processors and high RAM capacities. Consumers are opting for larger screen sizes, with black being the preferred base color.
